## **DETAILED ACTION**

This application is a national stage filing of PCT/JP03/13476, filed October 22, 2003, which claims benefit to foreign application 2002-310053, filed October 24, 2002 in Japan.

Applicants' amendment filed October 18, 2006 has been received and entered.

Claims 3-7 have been canceled. Claim 1 has been amended. Claims 8-21 have been added. Claims 1, 2, 8-21 are pending.

## Election/Restrictions

Newly submitted claims 10, 12, 13, 20 and 21 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: each of these claims require a specific type of antigen to be used in the claimed methodology, which would have been considered unique species of the genus of any antigen. An examination art for a non-allogenic antigen (the use of PHA) has been previously supplied.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10, 12, 13, 20 and 21 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims 1, 2, 8-9, 11, 14-19 are currently under examination.

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 8-9, 11, 14-19 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. 37 CFR 1.118 (a) states that "No amendment shall introduce new matter into the disclosure of an application after the filing date of the application". Specifically, the amendment to the claim to include the term "non-imortalized" is considered new matter.

Applicants point to page 12, lines 31-32 for support. It is noted that the indicated passage does recite "immortalization", however this in the context of the properties of paramyxovirus, in particular potential safety issues, not a limitation on the type of cell envisioned by the present specification. Moreover, it is noted that Yu *et al.* (1997) is cited as an example of such properties immediately following this passage (page 12, last line). A search of the remaining portions of the specification fail to provide literal support for "non-immortalized" and working examples (page 31 for example) provide the basis that the T cell lines were used and contemplated as part of the disclosure.

MPEP 2163.06 notes "If new matter is added to the claims, the examiner should reject the claims under 35 U.S.C. 112, first paragraph - written description requirement.

Art Unit: 1633

In re Rasmussen, 650 F.2d 1212, 211 USPQ 323 (CCPA 1981)." MPEP 2163.02 teaches that "Whenever the issue arises, the fundamental factual inquiry is whether a claim defines an invention that is clearly conveyed to those skilled in the art at the the time the application was filed...If a claim is amended to include subject matter, limitations, or terminology not present in the application as filed, involving a departure from, addition to, or deletion from the disclosure of the application as filed, the examiner should conclude that the claimed subject matter is not described in that application. MPEP 2163.06 further notes "When an amendment is filed in reply to an objection or rejection based on 35 U.S.C. 112, first paragraph, a study of the entire application is often necessary to determine whether or not "new matter" is involved. Applicant should therefore specifically point out the support for any amendments made to the disclosure".

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 stand rejected and newly added claims 8-9, 11, 14-19 are rejected under 35 U.S.C. 102(b) as being anticipate by Yu *et al*.

Applicants note the amendments to the claims to encompass 'non-immortalized' T cells, and argue that Yu *et al.* Fails to teach this limitation, only teaching transformed cells. Applicants' arguments have been fully considered, but not found persuasive.

It is noted that Yu et al. does anticipate non-immortalized T cells in the teaching of PBMC (see page 45, second column and Table 1). In this case, the procedure that produces the PMBC results in a population of cells, including T cells. With respect to the various specific cell surface markers recited in the new claims each of these would be inherently present in the population of PBMCs

#### Conclusion

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
